

WHAT SHOULD I BRING?

Students who are 23 years of age or younger should attend with their parent(s) or guardian(s). They should bring their parent's income and asset information listed below. If parents are unable to attend, students may attend alone and bring their parent's information. Students who are 24 years of age or older may attend alone and bring their own income and asset information.

- _ Federal income tax return for prior calendar year (and your spouse's if you are married), if already prepared. If not already prepared, bring previous year's returns for estimating income.
- _ Records of other untaxed income received such as veteran's benefits, or military or clergy allowances
- _ W-2 forms or other records (such as your last paycheck stub of the year) of income earned
- _ Recent bank statement, if you have a bank account
- _ Records of stock, bonds, or other investments
- _ Business or farm records, if applicable
- _ If you are not a U.S. citizen, your alien registration card or other immigration documentation
- _ A list of colleges and universities that you may be interested in attending

If you do not have or cannot find any of these items, please attend a workshop anyway so that a counselor can help you get started with the financial aid application process.
